

# Lean Construction - DK

Lean Construction-DK is the Danish branch of the Lean Construction Institute.

LC-DK is an association for companies and organizations in the Danish construction sector. LC-DK is the center of activities regarding the development of construction processes in Denmark.

Lean Construction-DK works to diffuse and implement Lean Construction in Denmark construction and includes both Danish and international knowledge about the lean construction process.

# Lean Construction - DK

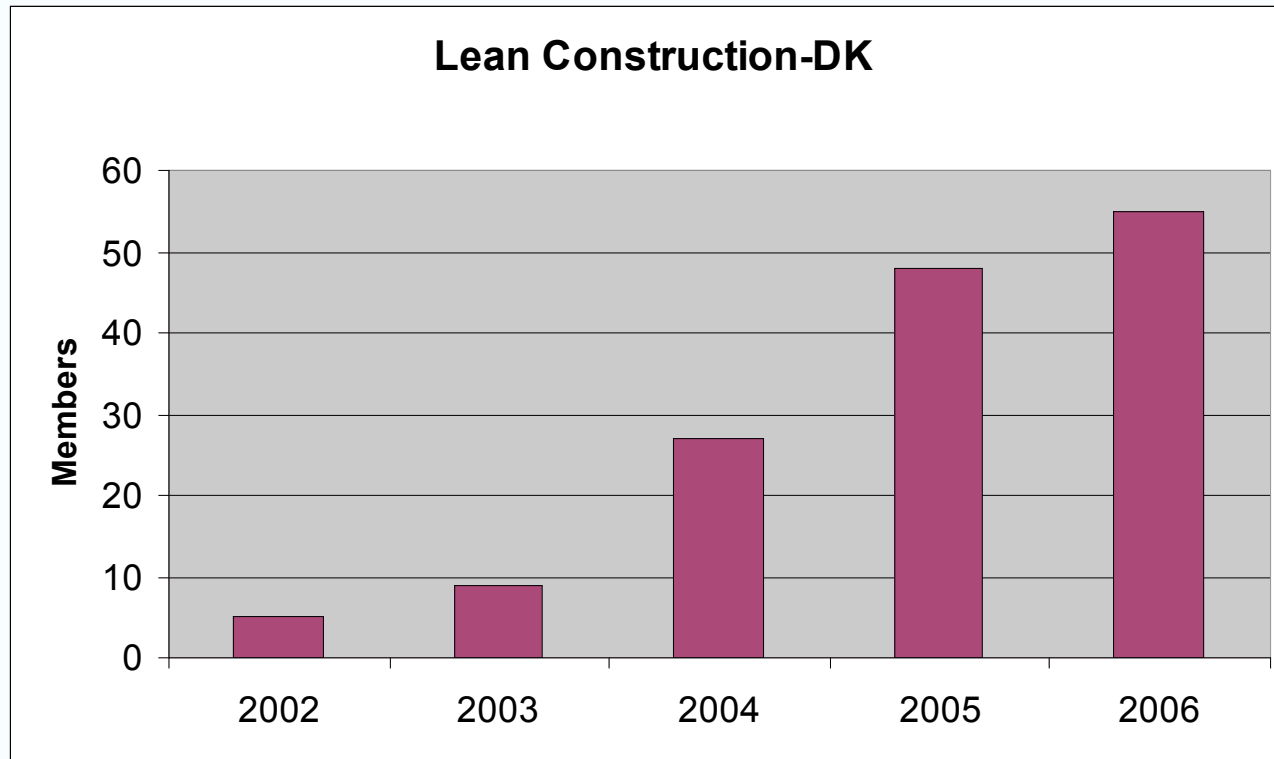

- Established as branch of the Lean Construction Institute in 2002
- Embedded in the Danish Technological Institute
- The association is established with a board constituted with construction industry members
- The Chair is held by:

# Lean Construction in Denmark

- Most of the larger contractors are to some extent using the Last Planner System™
- Most companies using LPS are still working on implementation – no company have achieved a real embedded LPS practice.
- The largest engineering companies are working with or interested in Lean Design, but few are at the point of implementation.

# Lean Construction in Denmark

- Lean Construction has court significant political awareness
- The development of new tools and practices under Lean Construction takes place in Lean Construction-DK
- Company driven development
- Several Danish PhD projects on Lean Construction related issues.

Thank you!
