SKILL RESPONSIBILITY INTEGRITY

The Principles and Application of Lean Construction Friday, April 22nd, 2005

Lean production management caused a revolution in the manufacturing world. Lean theory challenged the traditional notions about how to plan and manage work – and achieved new levels of performance in return. Products were manufactured in less time, at lower costs, and with improved quality.

A similar revolution is happening in construction, turning conventional wisdom on its head. Projects don't have to cost so much or take so long. Projects don't have to be as dangerous – and they don't have to end in a tangle of lawsuits.

Applied in practice, Lean Construction makes it possible to improve quality AND shorten project duration while reducing cost. This seminar will show you how to bring new levels of cooperation, integration and performance to your projects by applying new approaches to production control and coordination.

This full day seminar explores the foundations of lean thinking, production system design, the corrupting influence of variation, speaking and listening and finally the Last Planner System of Production Control. The workshop, conducted through a series of simulations, lectures, discussions and industry case studies, prepares the participants to understand and implement a lean initiative in their company.

| Speaker: | Date: Friday, April 22, 2005 |
| Greg Howell, PE | 8:00 a.m. Registration |
| Gregory A. Howell is co-founder and managing director of the Lean Construction Institute (LCI), a non-profit organization devoted to production management research in design and construction. | 8:30 Morning Sessions |
| Howell brings 35 years of construction industry project management, consulting and university-level teaching experience to LCI. A popular speaker, educator and author Howell regularly addresses industry groups on the need for a lean production revolution in design and construction. | 12:00 Lunch |
| His expertise in improving productivity has resulted in consulting engagements on power plants, petro-chemical facilities, commercial and industrial buildings, and infrastructure projects in North and South America and Africa. | 4:30 Session Concludes |
| | Location: Madison Concourse Hotel 1 West Dayton Madison, WI |
| | Registration Fee: \$175 AGC of Wisconsin Member \$300 Non-Member |
| | Registration Deadline: April 15, 2005 |

REGISTRATION FORM

Lean Construction

Friday, April 22, 2005

Madison, WI

Location:

Madison Concourse Hotel
1 West Dayton; Madison, WI

Registration/Refund Deadline: April 15, 2005

Registration Fee:

\$175 AGC of Wisconsin Member
\$300 Non-Member

Please register the following (for additional names, please use a separate sheet) Please type or print clearly.
