LEAN IN THE DESIGN PHASE

Gain insight to Lean approaches and tools relative to the design phase of project delivery to optimize team communication, collaboration and results. Understand how a Lean strategy can drive innovative solutions by connecting People, Principles and Practices. The key achievable goal of this course is to prepare and enable team members with a foundational understanding of Lean approaches for daily use within the design phase of a project.

1. OVERVIEW
   - Learn key definitions of Lean, uncover the breakdowns of traditional delivery outcomes, review foundational goals and benefits, recognize key components, and review the Six Tenets of Lean and recognizing Eight Wastes.

2. CONNECTING PEOPLE
   - Learn how to connect people through collaborative communication by understanding the Lean Mindset, identifying keys to developing a High Performing Team, creating the Project Promise, and Project Conditions of Satisfaction (CoS).

3. CONNECTING PRINCIPLES
   - Learn how to connect principles and practices in the design phase by discovering the benefits of key Lean approaches: Big Room Collaboration, Gemba in Design, and Collaborative Planning.

4. CONNECTING PRACTICES
   - Discover the connection between set-based design and point-based design, understand the impact of sound decision making, learn how to incorporate A3 Thinking into the design process, view the decision process flow for understanding, and identify differences between traditional and Target Value Delivery processes.
