

**Lean Construction Institute**  
Transforming the Built Environment

**Attend the Lean Construction Institute (LCI) Last Planners' Workshop to hone your skills in implementing Lean Project Delivery.**

**THANKS TO OUR SPONSOR:**

**This event is specifically tailored for those with considerable workforce experience in implementing Last Planner® and other Lean techniques on projects.**

Benefit from practical implementation advice and engage with colleagues in the field who are using Lean and facing many of the same challenges.

This is a highly collaborative forum for superintendents, foremen, and tactical field managers to share in a small-scale learning environment (40-50 attendees) in an approach geared to providing in-depth learning and sharing. Build connections among experienced peers for continued knowledge sharing across regions during and after the event.

We want attendees to be able to contribute from their experience, as well as gain from the insights of others. If you have gained such experience in Lean implementation and are looking to collaborate with others on their challenges and successes, this is the event for you.

## Last Planners Workshop

Sept. 11, 2018 | Minneapolis, MN

**RJM Construction**

830 Boone Avenue North  
Golden Valley, Minnesota 55427

### Workshop Topics

Attendees will decide on-site which topics to pursue in breakout discussion sessions based on a list of potential subjects, such as:

- Achieving by-in
- Better practices for onboarding
- Lean education in the field
- CPM/technology overlay, integration
- Role of re-planning and look ahead planning
- Role of senior management
- Scalability to large (or small) projects
- Others to be added (bring your hot topic – group votes will drive topics)

### Planning Team Members
